

**“EQUIPPED TO MEET YOUR NEEDS”**

## EcoFlow System

### **Main Features:**

Easy to use.

Suitable for any milking parlour.

Measures milk flow accurately for both large and small flow rates.

Suitable for cows, sheep and goats.

Collects data about the cleaning process.

Can control parlour gates.

Measures milking time, conductivity, milk yield and temperature of the milk without interfering with flow.

### Milking Technique:

- Unrestricted milk flow due to free flow Milk Sensor design.
- Ability to measure small quantities of milk, for cows, buffalo, sheep and goat milking.
- Indication of milk flow rate and total yield.

### Pulsation:

- Adjustable pulsation speed and ratio.
- Optional automatic or manually activated Stimulation.
- Optional milk flow controlled pulsation.

### Operation:

Optional remote start switch.

Possibility to operate parlour gates.

Possibility to operate separation gates.

### Cleaning:

- Minimum use of detergent and water for cleaning cycle due to low volume free flow Milk Sensor design.
- Monitoring of cleaning parameters with well defined alarm codes in case of deviations.
- Centralized parlour commands to send all units at once into or out of cleaning mode, straight from the keypad of just one random EcoFlow.
