

“EQUIPPED TO MEET YOUR NEEDS”

Fast Exit Elite Parallel Stall Systems

- Constructed from the same superior heavy-duty galvanized steel and stainless steel as our other quality stalls.
- A powerful hydraulic cylinder operates an entire row - up to 50 cows, raising the headstall to a full 62" clearance - high enough for even your largest cow.
- Can stand 24-hour duty with only down time for cleaning.
- Operator and cow safety are built into each system.

Designed to Outperform and Outlast

Minimum number of poles to impede cow progress. Fewer poles mean fewer down cows and room to get up on their own.

- Counter weights are used on the patented divider gates - removing the need for a spring return.
- Front design enables fast training of new animals.
- Push-button control allows safe and easy loading and unloading.
- Down button will stop exit action immediately.
