

"EQUIPPED TO MEET YOUR NEEDS"

VAL TurkeyMax

The VAL Turkey MAX without the angled rim helps prevent bruising.

The BigTom is rugged enough for even the most active birds.

Raise Cleaner and Healthier Turkeys

The VAL TurkeyMAX System is flexible as it allows for use in starter and finishing houses or start to finish houses. It is easy to connect to the VAL Watering System when using the VAL Adapter Nipple.

The angled rim helps prevent water from splashing on the floor.

Use the BigTom for the first 5-6 weeks and then the VAL TurkeyMAX can take over. It is very practical and beneficial for large numbers of birds. One can supply as many as 100 turkeys with water.

The VAL TurkeyMAX is also suitable for ducks and geese, as well!
