

“EQUIPPED TO MEET YOUR NEEDS”

FANS

**When Temperatures Heat Up
Let Us Help Cool You Down**

When selecting your ventilation requirements, look for fans with:

- Superior performance
- Maximum efficiency
- Minimum air flow resistance
- High quality construction for long life
- Exclusive warranty
- High quality efficient motors

When purchasing fans, the purchase price is very important but you should also consider the efficiency of them. This is measured in CFM/WATT, which means the amount of cubic feet of air moved in one minute at a certain static pressure using one watt of electricity. The higher the number the better! Some fans can pay back the difference very quickly.
