

“EQUIPPED TO MEET YOUR NEEDS”

Farrowing Crates & Floors

It is extremely important to have a long lasting farrowing crate that is both comfortable and safe for the farrowing sow and her litter. Our farrowing crates are made from galvanized steel, the length and width can be varied, creating the ideal amount of space for the sow. The crates come with anti-crush bars that will prevent the sow from crushing the piglets as she lies down.

The flooring at every stage of pig growth must be easy to clean, disinfect and they must be comfortable. This will help to reduce the amount of injury and stress to the animals as well as protecting their health.
