“EQUIPPED TO MEET YOUR NEEDS”

Operation of Self-Feeder

Self-Feeder with Hopper

Self-Feeder without Hopper

One of our newest products is the Intak Sow Self-Feeder.

The sow taps on the ball when she is hungry, allowing for food from the hopper to get into the feeder. This system saves time and labour costs, decreases feed waste. The Intak Self-Feeder increases feed intake during lactation and provides the sow with fresh feed 24 hours a day.
